CHANGING LIVES BIG AND SMALL THROUGH LASER THERAPY

With millions of treatments performed since 2018, Summus Medical Laser® has transformed the landscape of laser therapy.

FREQUENTLY ASKED QUESTIONS

Who is the ideal patient?

This treatment is for all animals, big and small. Summus Medical Laser® provides a holistic, pain-free approach to healing and reducing pain for your furry and feathered friends.

What does a treatment feel like?

Treatment times can range between 2-8 minutes. In that time, your pet will experience little to no sensation during treatment and may even fall asleep. Occasionally, your pet may feel mild warmth or tingling sensations and treatment areas may briefly feel sensitive before relief.

Are there any side effects?

Very few side effects have been reported. Older injuries or chronic pain areas may have some sensitivity for a few days post-treatment in response to the healing process.

How many treatments does it take?

It varies by your pet's condition. The veterinarian will work with you to customize the number of treatments to best suit your pet's healing needs.

When will I see results?

Results will vary. Some pets will experience improvements in comfort and mobility within 12 to 24 hours after the first treatment. Some results may need 3 to 4 sessions depending on the condition.

"It's only been 3 treatments and we're already noticing a difference in our 12 year-old arthritic lab mix. More energy, less limping, and long walks. It really does work wonders..."

- MARISA S.

PROVIDING RELIEF AND A SOOTHING EXPERIENCE

THE BENEFITS

Summus Laser treatments are proven to bio stimulate tissue repair and growth. The treatment accelerates the healing process by decreasing inflammation and reducing pain. When it comes to the management of chronic and acute pain, Summus Laser treatments can provide dramatic results for your pet. That's the Summus Standard.

SUMMUS MEDICAL LASER® TECHNOLOGY

Summus Medical Laser® harnesses the power of light therapy, providing proven non-drug, holistic solution, to help your pet's body heal itself.

The treatment delivers specific red and near infrared wavelengths of laser light to accelerate the healing process and reduce pain.

With millions of treatments performed for conditions from head to tail, Summus Medical Lasers® are the preferred choice for thousands of practitioners worldwide.

Drug Free Solution

No Sedation or Restraints Required

Soothing Relaxing Experience

Reduce Pain and Inflammation

Increase Range of Motion

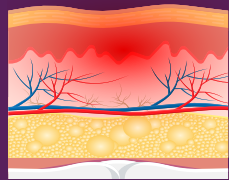

Enhance Tissue Healing

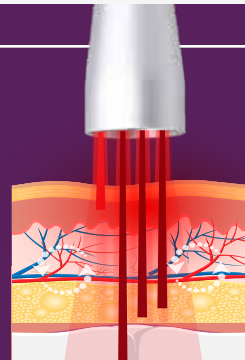

POST TREATMENT CARE

Consult your veterinarian before your pet returns to full activity to ensure optimal results and avoid re-injury.

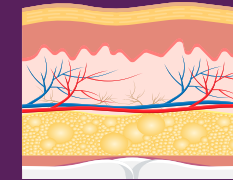

THE SCIENCE OF SUMMUS LASER THERAPY

Your veterinarian will determine the treatment area(s).

Summus Medical Laser® sends specific red and near infrared wavelengths of laser light to the treatment area to increase circulation.

Healing is activated to reduce inflammation, swelling, and pain.
